AutoCAD is intended for civil and mechanical engineers and architects and, more recently, for petroleum engineers and geologists. Some newer features are accessible only in the desktop versions of AutoCAD. Let's get started. 1. Downloading AutoCAD This download link includes the AutoCAD 2011 Classic and the AutoCAD 2010 Review Edition (Windows only). Download AutoCAD 2011 Classic Download AutoCAD 2010 Review Edition To create a new AutoCAD license (a.lic file) and configure the licensing settings, you must use the install.exe files found within the AutoCAD installation folder. Double-click the install.exe file and follow the on-screen prompts to perform the installation. The installer will bring up the AutoCAD setup window and prompt you to enter a license number and activate your license. When prompted to activate your license, select the.lic file for your AutoCAD version and click OK. You can close the AutoCAD setup window and return to the desktop. 2. Uninstalling AutoCAD If you purchased a license from Autodesk, simply run the uninstall.exe file included in the AutoCAD installation folder. If you purchased a license from a distributor, contact your distributor to receive the uninstall.exe file. 4. Migrating from the Classic to the 2010 Review Edition In 2010, AutoCAD was released as both a Classic and 2010 Review Edition. The Classic version has been phased out in favor of the 2010 Review Edition. If you have AutoCAD 2010 Review Edition installed and you want to switch back to the Classic version, follow these steps: 1. Download the.lic file for the Classic version of AutoCAD (not the 2010 Review Edition). 2. Run the install.exe file for AutoCAD Classic. 3. In the AutoCAD 2010 Classic license setup window, select the.lic file for the Classic version and click OK. 4. Repeat step 3 until you have selected the Classic version of AutoCAD. Note: You cannot downgrade a Classic license to 2010 Review Edition, so if you want to downgrade, you need to purchase the Classic version and license it again. 5. Migrating to the Web App With the Web App, you can create models and drawings directly on the web browser. Auto
