MasterSplitter Free Download

MasterSplitter is a very powerful piece of software that is able to split large plain text and binary files into smaller parts. The application offers users the possibility of specifying the split number, as well as making the program delete the original file at the end of the job, saving the files to the same directory, auto comparing items after splitting them, as well as saving the last used settings. You are also allowed to specify the first split piece, save it to the same directory as the original files, and skip the missing pieces. Furthermore, comparing the original and split file is particularly simple, as you only need to add the documents to the list. Since there aren't many configuration settings, even a rookie can make the most out of every single built-in feature. During our testing we have noticed that the program manages to split files quickly and without errors throughout the entire process. It remains light on the system resources, so it doesn't affect the overall performance of the computer. All things considered, MasterSplitter is a simple software solution that helps you split files quickly and easily. Although it cannot compete with other powerful tools in its category, it does what it says, and is suitable for beginners and experts alike. MasterSplitter is able to split large files (plain text or binary) into smaller pieces, making them compatible with other applications that require their use. During our tests we found out that the program is able to split large files really fast and with few errors. MasterSplitter supports the ability to drag and drop files to the main window, or use the built-in browse button. Users are also allowed to specify the split number and delete the original file at the end of the job. Furthermore, users can specify a first split piece, save it to the same directory as the original files and skip the missing pieces. Additionally, MasterSplitter is compatible with a variety of file types, including Word, Excel, MS-PowerPoint, MP3, MP4, and more. The application remains lightweight and works without taking a large portion of the system's resources. Comparison with other software: To begin with, MasterSplitter is a very powerful program, but it also has a rather simplistic interface. Even a novice user can master the tool without much of a problem. Compared to other products of this type, MasterSplitter has some unique features, including the ability to specify the first split piece and to automatically skip the missing
