If we calculate the real and imaginary parts of \$i\$ we get \$1\$ and \$0\$ respectively. But the exponent \$2\$ is not a real number and the imaginary part is \$0\$ so why are we multiplying it by \$0\$? 2) A spherical coordinate is \$(\theta,\phi)\$ such that a point on the \$xy\$ plane is given by (θ,ϕ) . How can the equation $x^2+y^2+z^2=r^2$ be used to find θ and ϕ \phi\$? A: \$1)\$ \$\$\displaystyle i=\frac{1-i}{1+i}=\frac12\left(1-i\right)\$\$ so both the numerator and the denominator of \$i\$ equal \$1\$. Aims The aim of the project is to develop and evaluate a new theory of training in order to better equip trainers in the health sector. The new theory extends Jonasson's principles on the pragmatics of training. The concept of trainingscape comprises three factors: The student, the trainer

* Adding colors directly to your document * Loading and previewing themes * Assigning theme colors to different elements * Adjust the color to match your design * Preview colors from different themes * Customize background and foreground color * Modify colors with the best selection of color picker Publisher Description: Print as PDF from SharePoint Sites has been one of the essential features of SharePoint for a long time. Now you can print as PDF from SharePoint Sites, email directly as a PDF document, or receive a link to a PDF document that can be viewed with any PDF reader. The Print as PDF from SharePoint Sites option enables you to print a page to Adobe PDF format from your SharePoint web site. You can view the PDF document using a PDF reader or you can send the PDF document to others using an email program. The Print as PDF from SharePoint Sites option also provides the ability to print the entire web site, or just a specific page to Adobe PDF format. Using this feature, you can print multiple pages from SharePoint 2007 using a PDF printer attached to your printer server or print a single page using the browser print function. With Print as PDF from SharePoint Sites, you can also generate a PDF file or an email that is sent to the recipient. This can be used to allow the recipient to download the PDF document from a server. Because you are sending the PDF document to the recipient, you can print without having to log into the SharePoint web site. The Print as PDF from SharePoint Sites option provides an easy way to print documents or a page to Adobe PDF format. In addition, the option provides the ability to print the entire web site or only a specific page. This capability allows you to print individual web pages or a complete web site to a PDF printer that is connected to your server. E-mail the PDF document to others using an email program. The PDF document can be sent from a computer running Microsoft Windows, an Apple Macintosh or another operating system. Download and install the PDF driver. Open the CD-ROM drive on your computer. Insert the installation CD-ROM. The software is installed automatically. Execute a printer driver for your type of PDF printer. To see the printer driver that is available on your computer, open the Control Panel on your computer and select the Printer icon. Locate a list of drivers that are available on your computer. Open the SharePoint Print as PDF from SharePoint Sites installation file.
